

Docket #02-278

Please throw out this petition to weaken our state's telephone privacy law. We in Indiana very much appreciate this law, and do not want telephone solicitations from so-called "partner" banking institutions. When we signed up for telephone privacy, we were saying we did not want thee calls, and it has been very effective. Please do not water down our law and make it so intrusive like it used to be. We get enough spam in our email boxes right now. Turn your energies into fixing this very real problem instead of breaking the solution to our last problem of this type. The majority of the people have spoken by signing up for this service. As a public commission, serve the people in the manner that we desire. Repeal this 02-278 petition and crack down on spam in the electronic area. These are the same people intruding in our lives after we have told them "NO!" I consider this, and spam, just that, ELECTRONIC RAPE. We have said "no" more than once, so honor our request!
